PROFESSIONAL EXPERIENCE

SOFTWARE DEVELOPER/FRONTEND DEVELOPER

Ripcord Security Software | Fairfax, VA | October 2025 – Present

Contributed to the development and modernization of an enterprise cybersecurity Governance, Risk, and Compliance (GRC) platform. Expanded from frontend development into backend application functionality, database integration, authorization logic, reporting automation, and application debugging within a collaborative software development team.

- Developed back-end functionality using Python and Flask, including application routes, business logic, REST API integrations, and feature enhancements.
- Designed and modified MySQL database tables supporting authentication, reporting, user management, and enterprise application workflows.
- Diagnosed and resolved frontend and backend issues using Chrome DevTools, browser console diagnostics, and Python debugging tools while contributing to Git/Gitea-based automated deployments across IIS-hosted application environments.
- Designed and developed an intelligent document import center supporting Microsoft Word, Excel, PDF, and CSV files that extracts, maps, validates, and stages user data before import, significantly reducing manual data entry.
- Developed an automated reporting engine that generates professionally formatted Microsoft Word documents directly from application data with dynamic portrait and landscape page formatting.
- Developed responsive, accessible front-end interfaces using HTML5, CSS3, JavaScript, Bootstrap, and reusable UI components.
- Modernized the application's user interface and user experience by redesigning navigation, layouts, workflows, and information architecture, improving usability across the platform.
- Architected, designed, developed, and deployed the company's public website and secure PHP-based client portal, integrating SQL-backed authentication, account management, and software distribution while defining the site's information architecture, navigation, and responsive user experience.

DIGITAL DESIGNER / WEB DESIGNER / Frontend Developer
TCG (The Creative Group / Robert Half) | VA/DC/MD | January 2019 – September 2025

- Delivered website layouts, digital design, and user interface projects for commercial, nonprofit, and government clients.
- Collaborated with cross-functional teams to translate business requirements into user-centered digital solutions.
- Developed advertisements, social media, information, and event graphics, while maintaining consistency across client brand standards.

GRAPHIC DESIGNER
Northern Virginia Magazine | Chantilly, VA | January 2023 – May 2024

- Produced monthly publication layouts, digital assets, and marketing collateral while collaborating with editorial, advertising, and managing photography teams under strict production deadlines.
- Managed multiple projects while maintaining brand consistency across print and digital media.
- Managed a team of photographers, hiring, booking, budgeting and scheduling for internal/external vendors and clients.
- Cross-department communication to meet project deadlines, worked with all external stakeholders to satisfy their marketing/design needs.

GRAPHIC DESIGNER
Thurgood Marshall College Fund | Washington, DC | May 2015 – August 2018

- Managed creative projects from concept through production while collaborating with marketing teams, vendors, and stakeholders.
- Developed digital and print communication materials supporting national events and organization-wide initiatives.
- Managed interns, print vendors, scheduling and deadlines for all creative projects, collateral, and events.
- Condensed and developed branding guidelines for the company, created/developed the TMCF logo that is still used today.
- In charge or branding, brand management, brand production and internal/external display through vendors, and all partnership programs of the TMCF Brand.
